What is the essence of education?
We've always had the answers
but we are always seeking for the better.

Explore the Essence

1. ABOVE IMAGINATION

With unwavering dedication and a commitment to the essence of education, VISANG is forging an innovative paradigm beyond the conventional education industry.

By combining top-quality contents with cutting-edge IT technology, VISANG is spearheading the transformation of education as an Edtech Corporation.

With an extraordinary commitment to the essence of education, VISANG is shaping the future of EdTech.

VISANG-ism

Just as people are different,
the way and the stage of the education
they need are all different.

We expand the potential of each learner
by offering solutions to meet the need of learning,
no matter where their starting point may be.

We foster a classroom that help learners acquire
new knowledge, deepen their existing understanding,
and grow and develop by themselves.

**Lively and Interactive Learning journey
by Interactive Class System**

We promote a joyful experience and growth for everyone. There is no one in the world who does not need education. That is why we develop customized learning EdTech solutions for learners and teachers around the world.

**Global EdTech Company
for All**

Business Overview

Since the publication of "HAN-KEUT" in 1998, VISANG has consistently striven to create a more satisfying educational environment in every aspect of education, including textbooks, supplementary books, and self-directed learning. Recently, VISANG introduced a new class system for schools, Interactive Class System, developed with our own AI technology. Our goal is to enhance the quality of education on a global scale, with the aim of bridging the educational disparities that exist at various levels of education through the distribution of its proprietary educational technology. For this reason, VISANG unwaveringly upholds the vision of global EdTech and seeks to expand its positive impact worldwide.

Digital Education Platform for School

VISANG has developed a data-driven Interactive Class System to create a personalized learning environment in schools. To keep pace with the fast-changing world, VISANG maintains continuous communication with teachers, conducts research and development, and provides a digital education platform with its proprietary technology solution. As a result, VISANG now delivers an interactive class system that embodies the essence of education. It offers a personalized study planning system and a real-time feedback and assessment program, surpassing both the Content Management System (CMS) and the Learning Management System (LMS).

AI Digital Textbooks

Published digital textbooks based on the 2015 educational curriculum revision

VISANG is at the forefront of the education sector, publishing 'digital textbooks' tailored to the smart learning environment in class. Our proficiency is the result of continuous research and development on our exclusive digital education platform. Moreover, our five-year partnership with the Ministry of Education in digital textbook demonstration project reflects our dedication to advancing education.

Published and distributed 36 types of digital textbooks -elementary, middle, and high schools on-site

Development of various digital textbooks for tablet PCs and smart learning environments

Cooperative system established and Contents developed with the 'HI-CE Laboratory, University of Michigan'

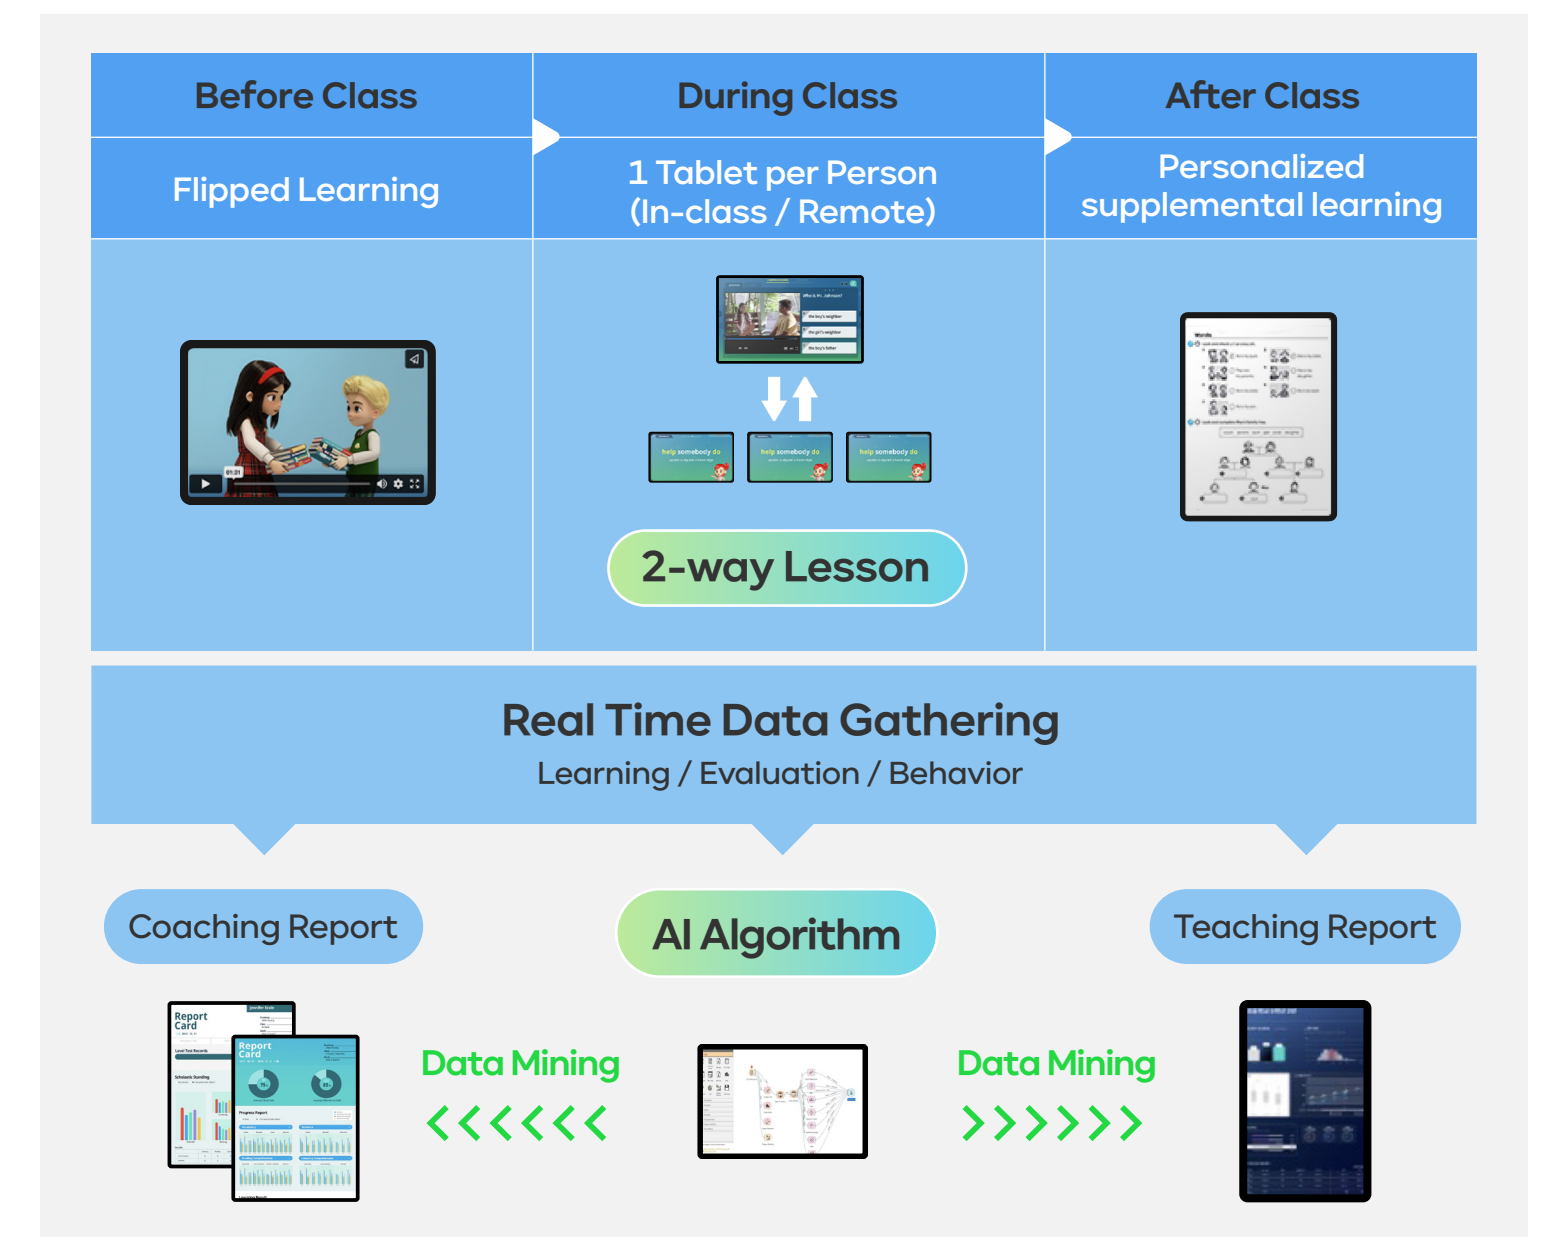

conducted research and development of English digital textbook models sponsored by the Korean Institute of Curriculum and Evaluation (KICE).

Development of science digital textbooks to support customized learning environment design and project-based learning in collaboration with 'Qualcomm'

Interactive Class System (ICS)

VISANG has developed the 'Interactive Class System (ICS)', which encourages greater student engagement in the classroom and empowers teachers to enhance students' learning skills by concentrating on their learning processes. To realize personalized learning for each learner, teachers can collect and analyze data of each student using ▲the class setting tools, ▲collaborative class activity tools, ▲real-time diagnosis and evaluation tools, and ▲artificial intelligence (AI) data analysis tools provided by ICS.

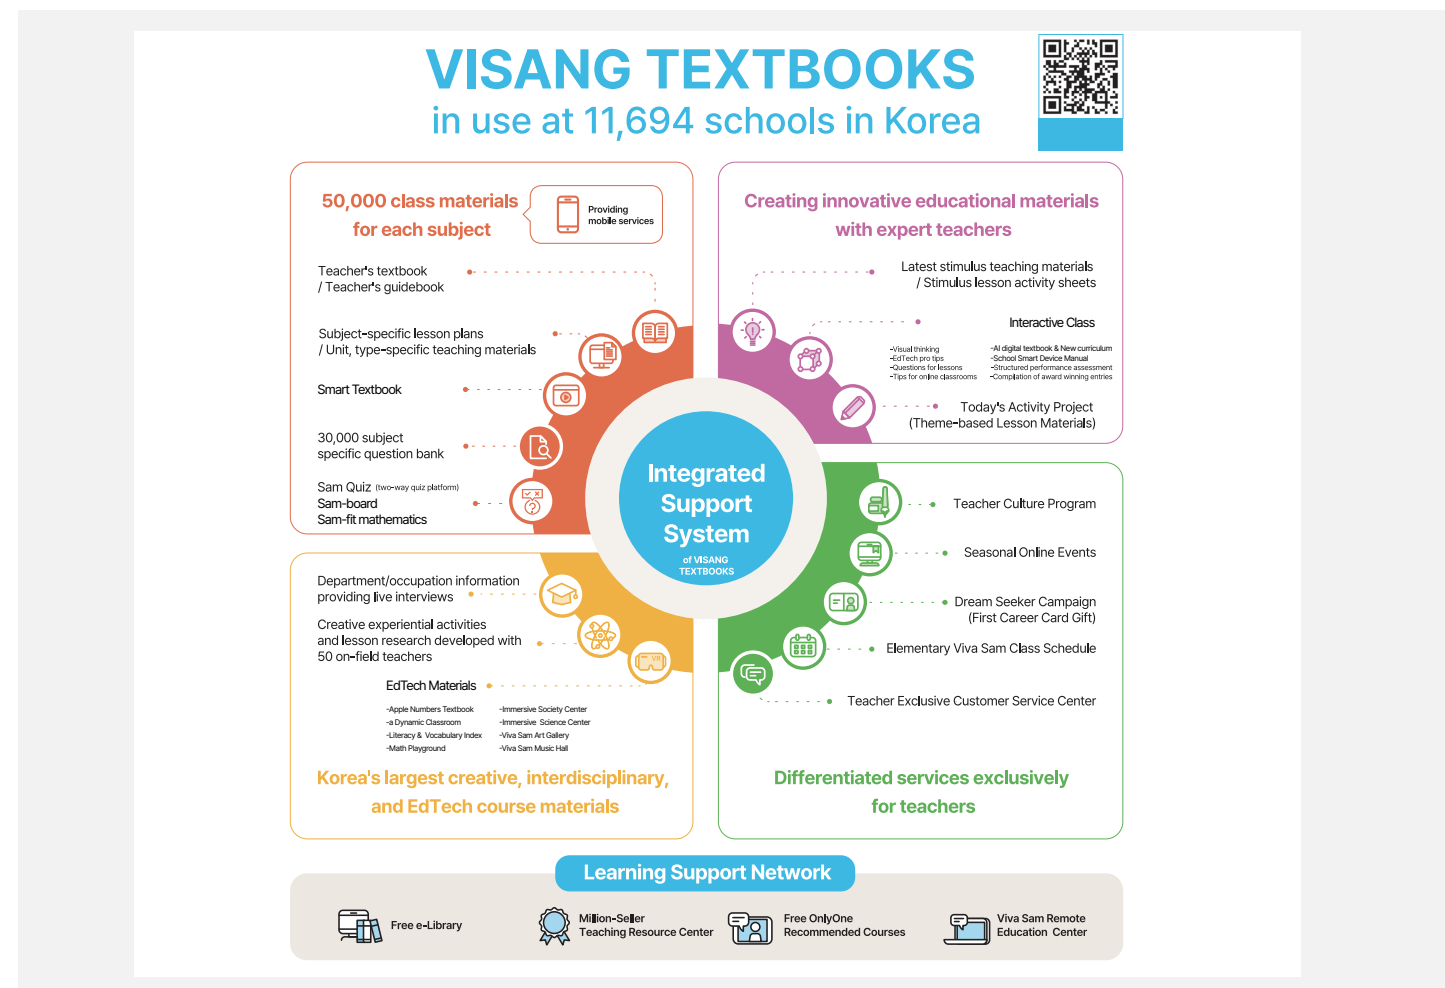

Digital Education Platform for School

Viva Sam

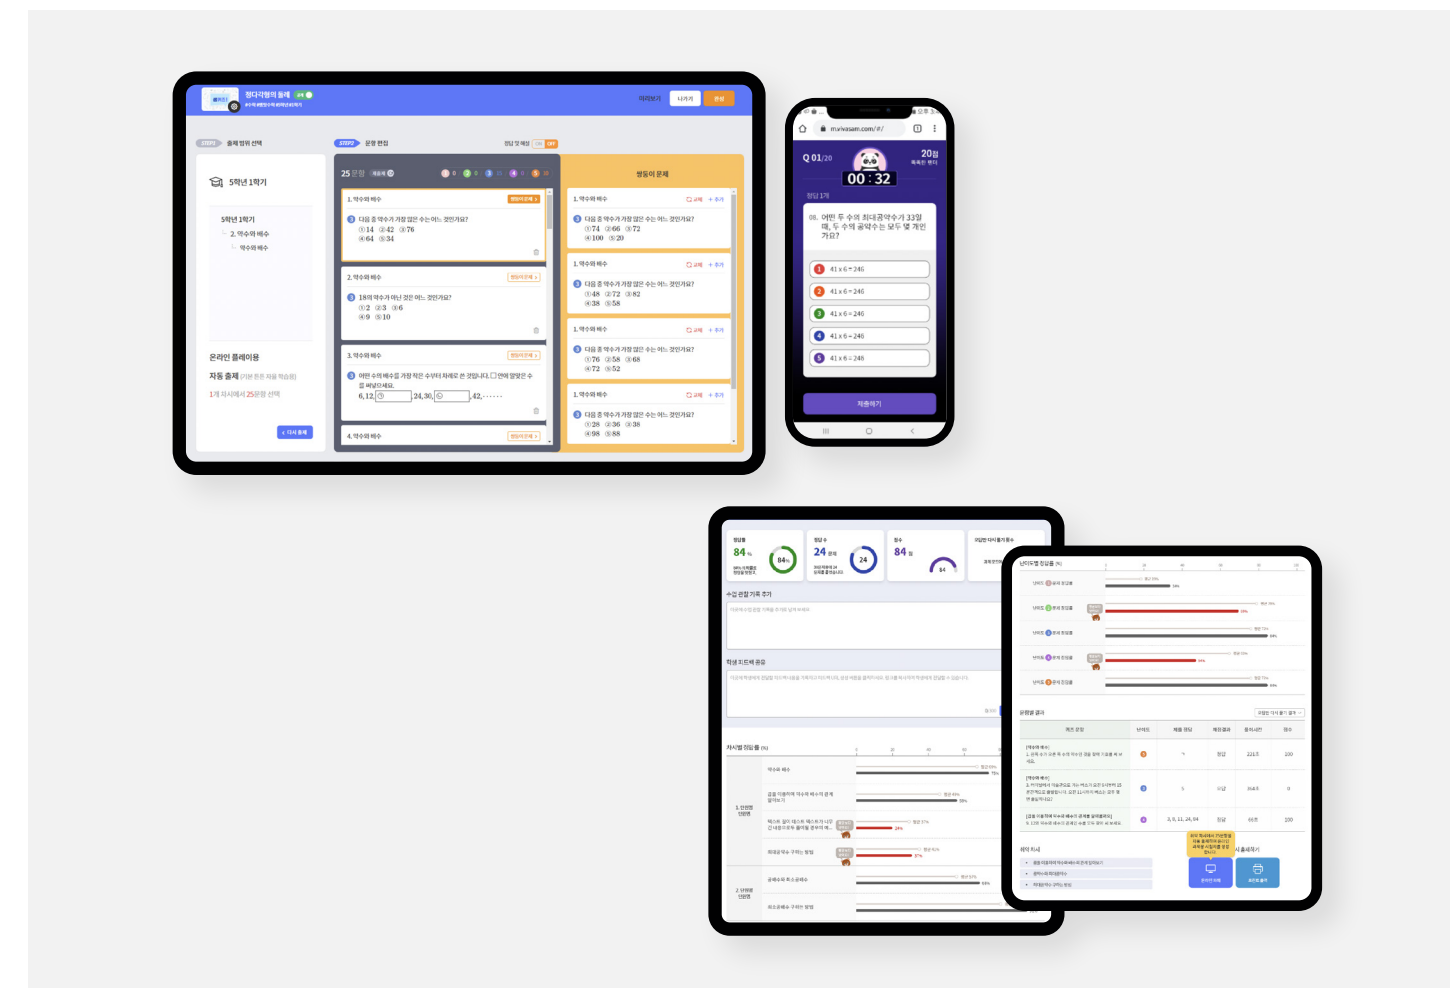

'Viva Sam' is an EdTech-based professional teaching support service for teachers that provides a wide range of valuable resources for all school subjects, including virtual science labs, digital math tools, localized social data, and VR/AR activities. Viva Sam enhances teachers' competence by offering mandatory in-service training programs as well as customized theme-based training programs through the Viva Sam Remote Education Training Center.

Sam Quiz

'Sam Quiz' is an interactive EdTech service that provides online teaching tools through 'Viva Sam', an EdTech-based professional learning support service for teachers. Sam Quiz offers quizzes to encourage students to become more actively engaged in class, enabling real-time interactive communication between teachers and students. It has also been selected as a pilot program for the 2023 KYONGGI EdTech Soft Lab.

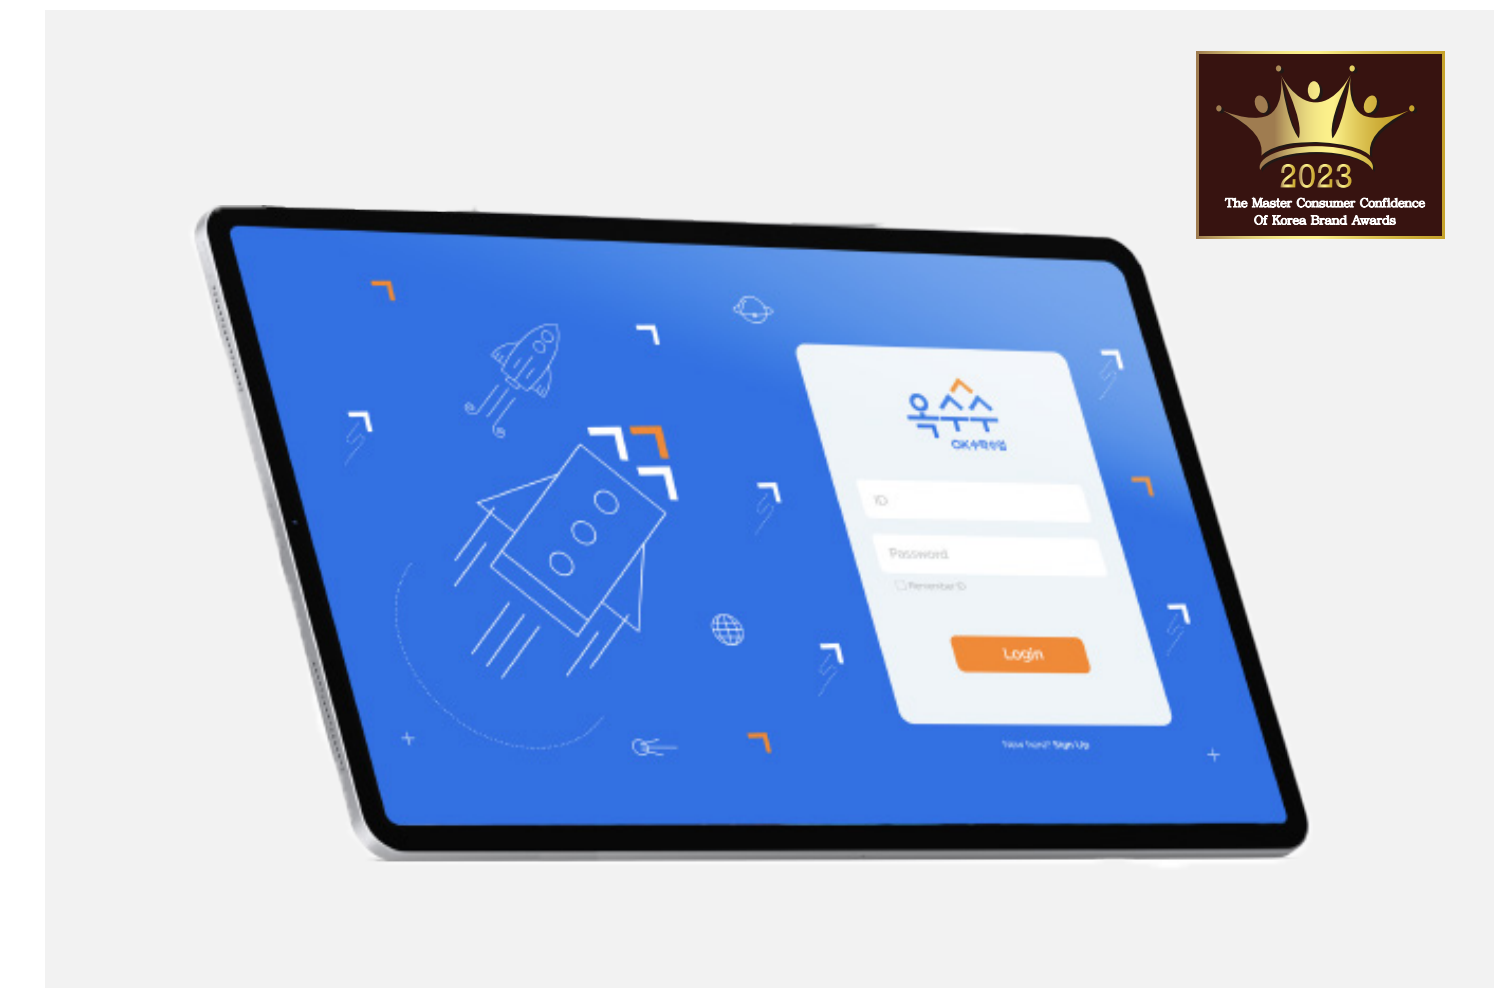

oksusu

'oksusu' is an AI math program designed for elementary, middle, and high schools. Its unique 'OK-AI' technology offers personalized learning based on diagnostic assessments, boosting student focus and performance. It provides customized tests from textbooks and helps teachers manage evaluations and incorrect answers in one place, creating an ideal learning environment.

2023 Korea No.1 Consumer Trusted Brand Award

Digital Education Platform for Self-Learning

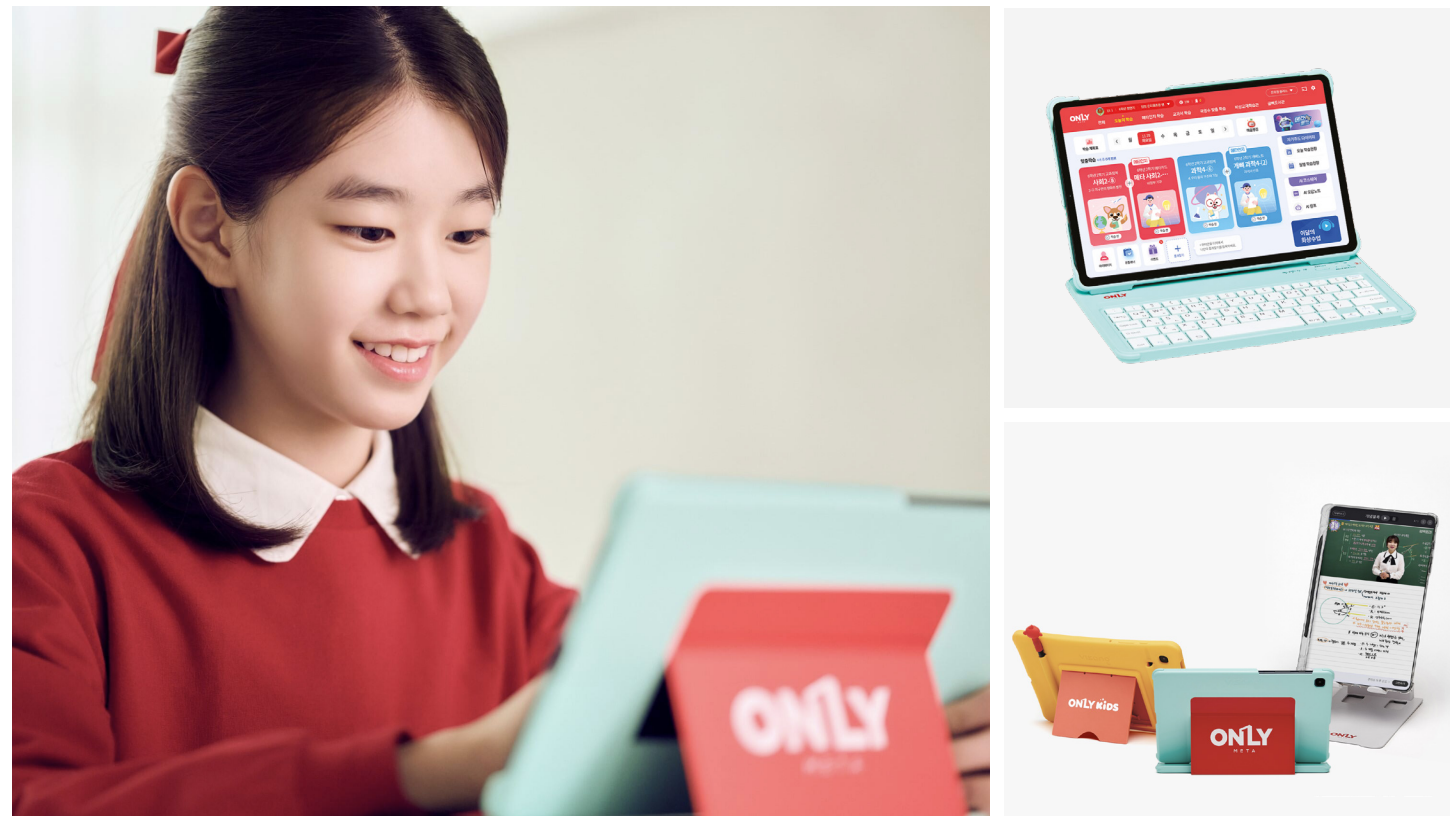

OnlyOne

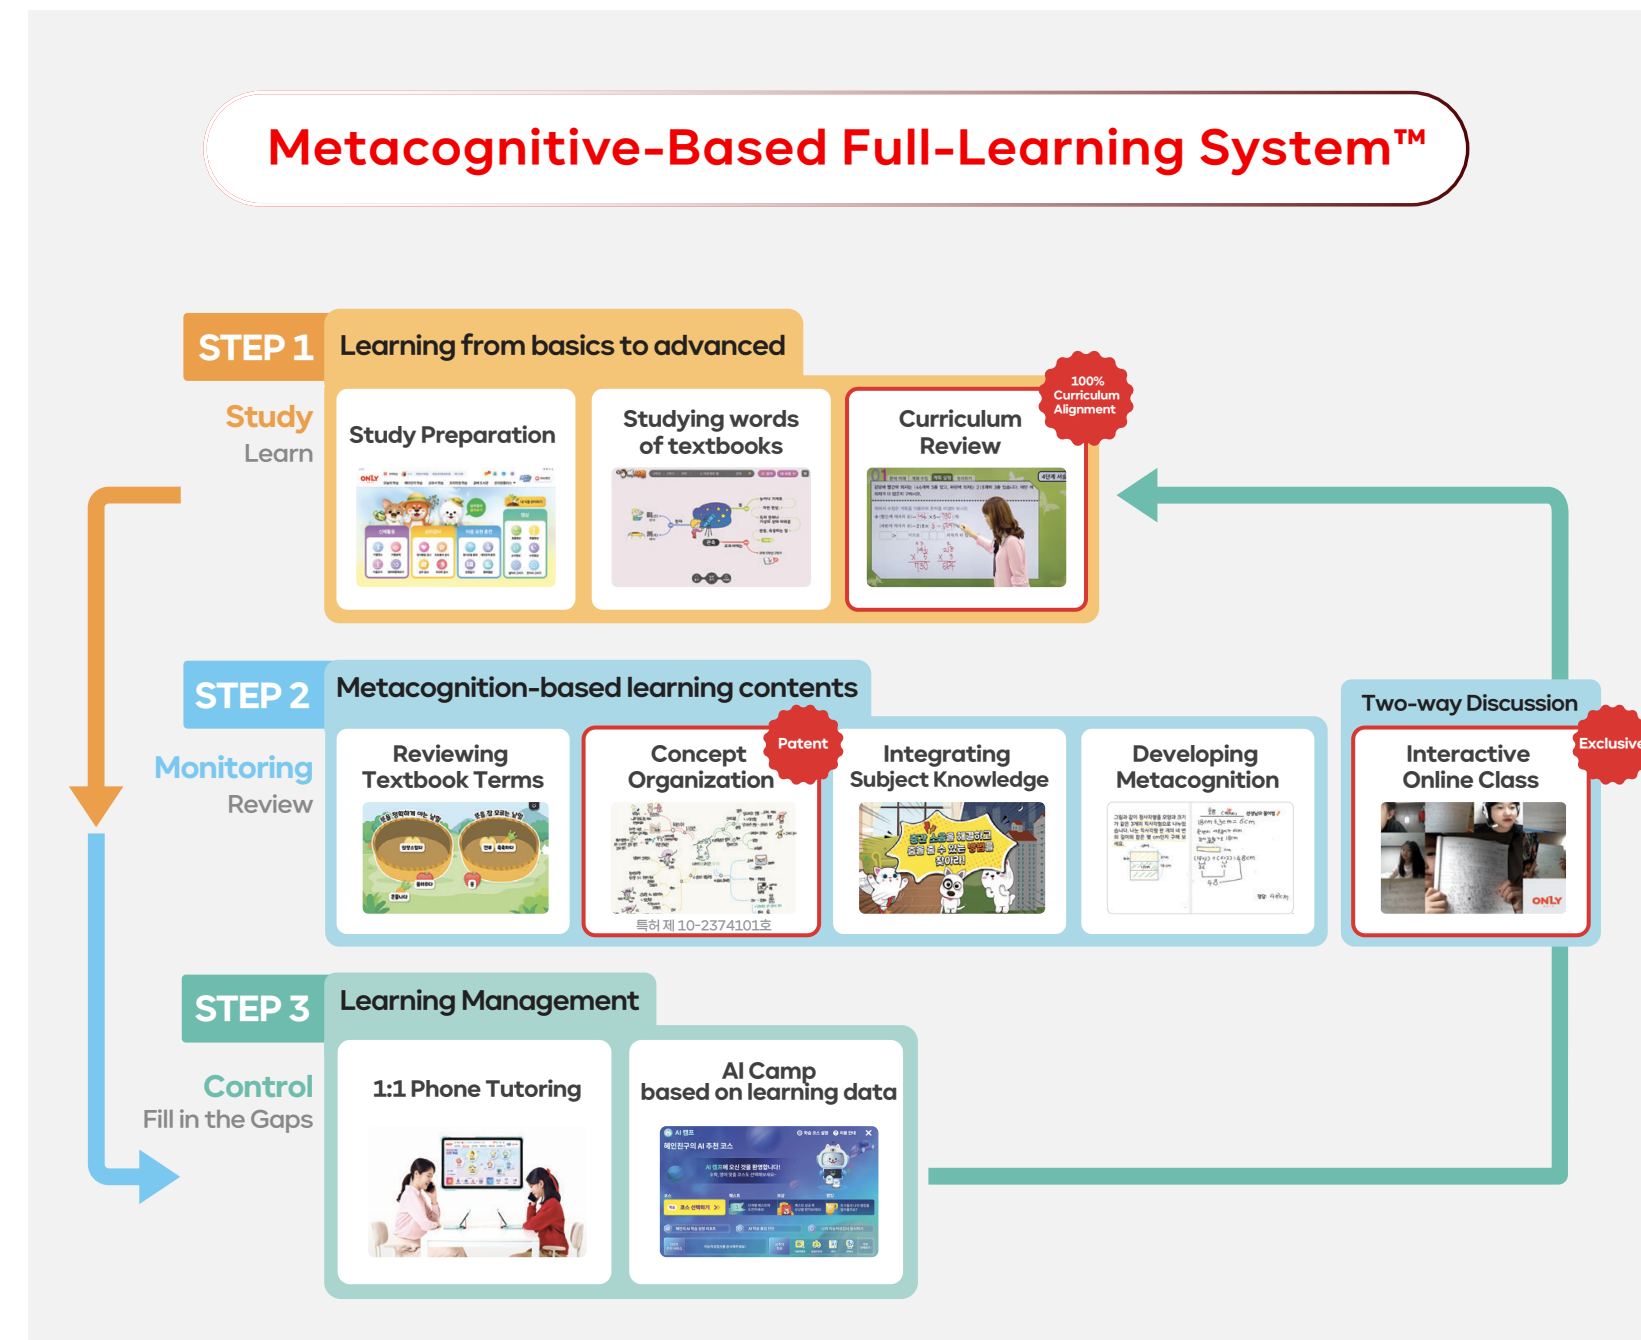

The Trusted Choice of 9 Million Members

'OnlyOne' is the only Metacognitive-Based Full-Learning System™ in the world, enabling unparalleled self-directed learning abilities like never before. Reflective thinking, as a component of metacognition, involves critically reflecting on learning experiences and processes for future progress. By systematizing metacognitive theory on smart devices, it provides an all-grade learning system designed for one individual, accessible anytime and anywhere.

The first metacognition-based learning system for all grades in Korea

VISANG has launched a comprehensive self-learning system suitable for all ages, grades, and levels. It combines the ultimate learning skill, the realization of metacognition, with mental health care counseling and learning mentoring. Based on this program, VISANG has succeeded in systematizing the best self-learning environment using digital devices that anyone can access regardless of location and time.

tabtap

The Essential App for Achieving Top Grades in All High School Subjects!

With the 'tabtap' app, students can perfectly prepare for both school exams and the Korean SAT, anytime and anywhere. It offers personalized practice questions through its AI Customized Tests service, along with a rich collection of learning content, including VISANG eBooks featuring VISANG bestselling textbooks. Additionally, schools across South Korea are currently utilizing its service for interactive lessons between teachers and students, enabling teachers to provide personalized learning tailored to each student.

tabtap's AI provides customized tests for school exams and the Korean SAT

Digital Education Platform for Global Learners

To date, VISANG has become South Korea's leading education content company. It is now embarking on a transformation into an EdTech company, guided by two key principles: 'digital' and 'global.' This evolution is in response to external challenges such as a declining school-age population, evolving learning needs, and the emergence of the Fourth Industrial Revolution. In 2016, VISANG successfully introduced digital education platforms, 'englisheye' and 'Wings,' to a global audience. Since then, VISANG has been actively working toward achieving 'digital pedagogy' by implementing a data-driven Interactive Class System and AI-generated personalized education platforms. We contribute to enhancing the quality of education worldwide and strives to narrow the gap between different levels of education through the distribution of our proprietary educational technology.

AllviA CL

Exported to Thailand, Singapore, UK, Latin America

'AllviA CL' is a digital educational platform that integrates student-centered digital learning systems with innovative coaching methods. It is adaptable to any textbook, classroom environment, or language setting. Students can actively engage in class, and teachers can monitor their participation at the same time, enabling the implementation of student-centered learning and a transformation of the classroom environment.

Export Status

Business Sales Achievement

50 billion KRW in sales

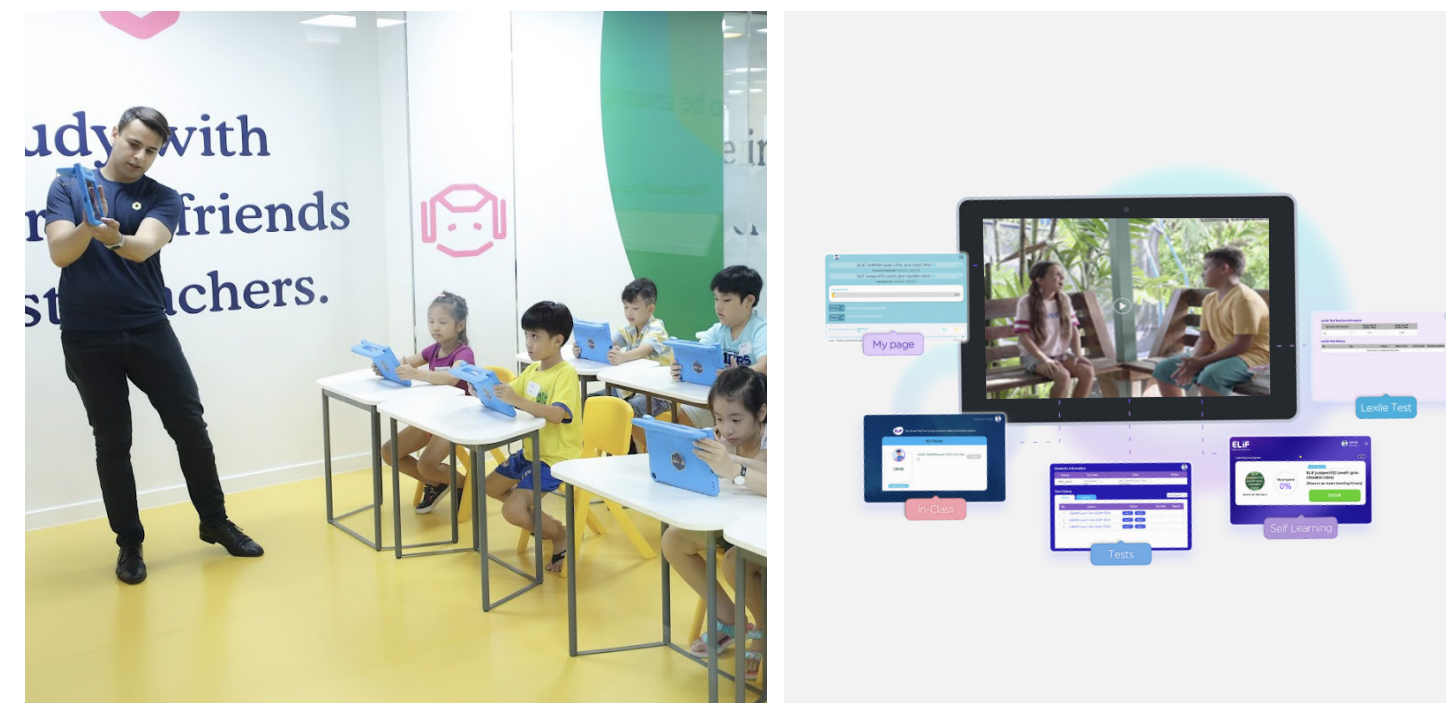

ELiF

In operation at Sangmyung University-affiliated Elementary School and Unhyeon Elementary School

'ELiF' is an English learning program designed for elementary school students, delivered through VISANG's digital educational platform, AllviA CL. It enables interactive lessons, class preparation, and reviews using teachers' interactive whiteboards and students' tablets. ELiF enhances learning outcomes by incorporating a comparative evaluation method drawn from internationally recognized tests, enriching the comprehensiveness of its content. The program's contents are further enhanced with videos from around the world, including the U.S., and 3D animations that explore everyday life and elementary school subjects.

Contracts signed and classes held in Vietnam

Math Alive

Exported to US, UK, Thailand, Singapore, Vietnam

'Math Alive' is a global math learning program developed by VISANG that integrates elementary math content via its digital education platform, AllviA CL. Designed and developed for students worldwide, Math Alive uses the interactive class system that connects teachers' interactive whiteboards with students' tablets. Each math learning course has been created to align with the academic achievement standards of the US curriculum, Common Core State Standards (CCSS).

Digital Education Platform for Global Learners

Oxford Discover Futures

VISANG and 'Oxford University Press (OUP)', the UK's leading educational publisher, signed a licensing agreement in 2021 to provide students with access to the digital version of 'Oxford Discover' via AllviA CL. The 'Oxford Discover series' consists of the 'elementary-level Oxford Discover' and the 'secondary-level Oxford Discover Futures'. It is designed for interactive English learning through the AllviA CL authoring solution, utilizing Oxford E-books (or PDF versions of the books).

Wings

Contracts signed and classes held in China, Vietnam

'Wings,' launched in July 2016, is an interactive early childhood English learning program serviced via digital devices. Wings creates an activity-based language learning environment, encouraging children, who are already familiar with digital technology, to transition away from one-way, knowledge-focused education. This approach reduces resistance to learning English and promotes 'enjoyable communication.' By utilizing interactive teaching methods with students' tablet PCs, textbooks, and teachers' interactive whiteboards, it effectively fosters well-rounded development in listening, speaking, reading, and writing skills.

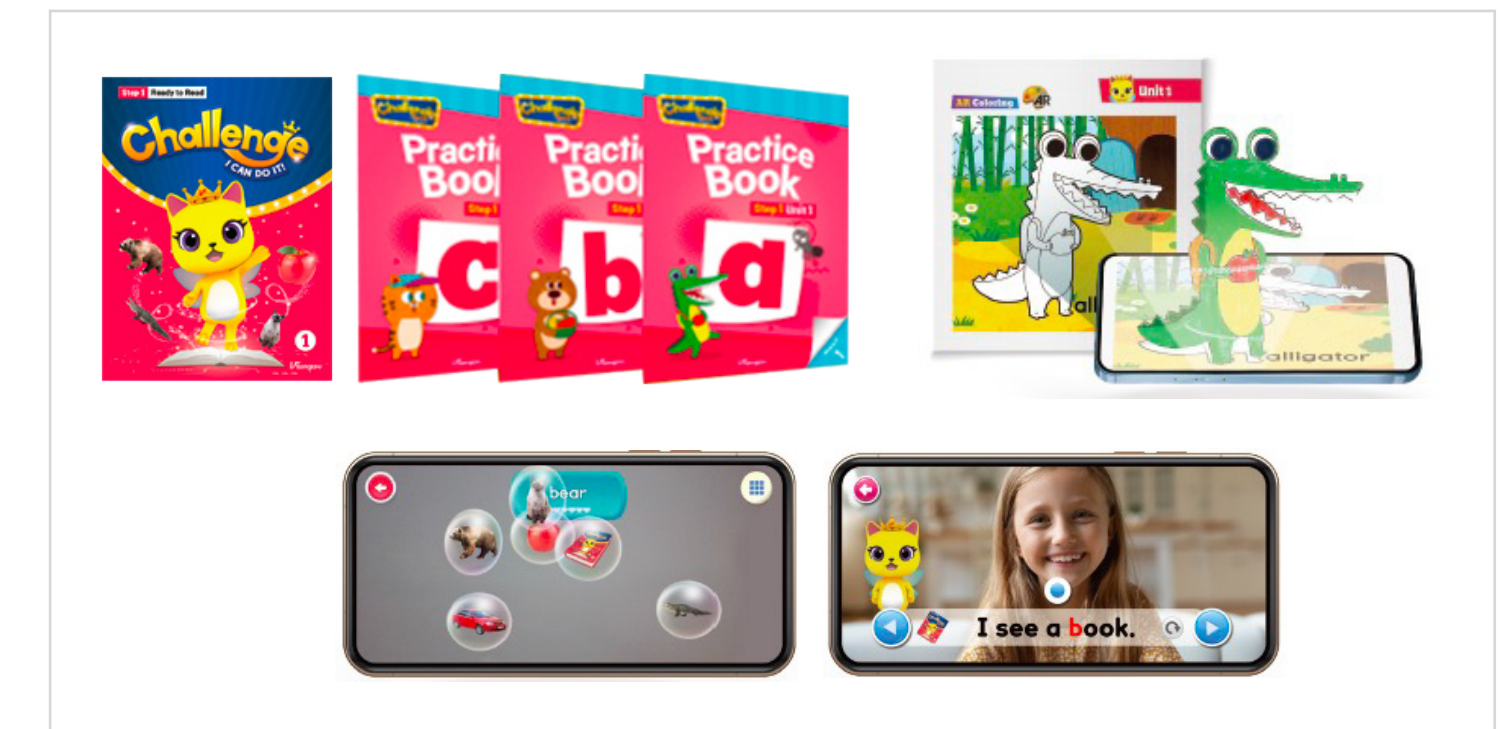

Challenge

Contracts signed and classes held in China, Thailand, and Paraguay

The phonics-based English reading program, 'Challenge,' is an experiential English program for early childhood level. It is designed to enhance digital literacy while making learning enjoyable through the integration of Augmented Reality (AR) and Motion Recognition (MR) technologies. It provides a well-structured learning system aimed at assisting digital-age children in developing balanced reading skills. By actively participating in MR and experiencing AR, children gain self-learning skills and derive fun from the learning process.

Digital Education Platform for Learning Korean

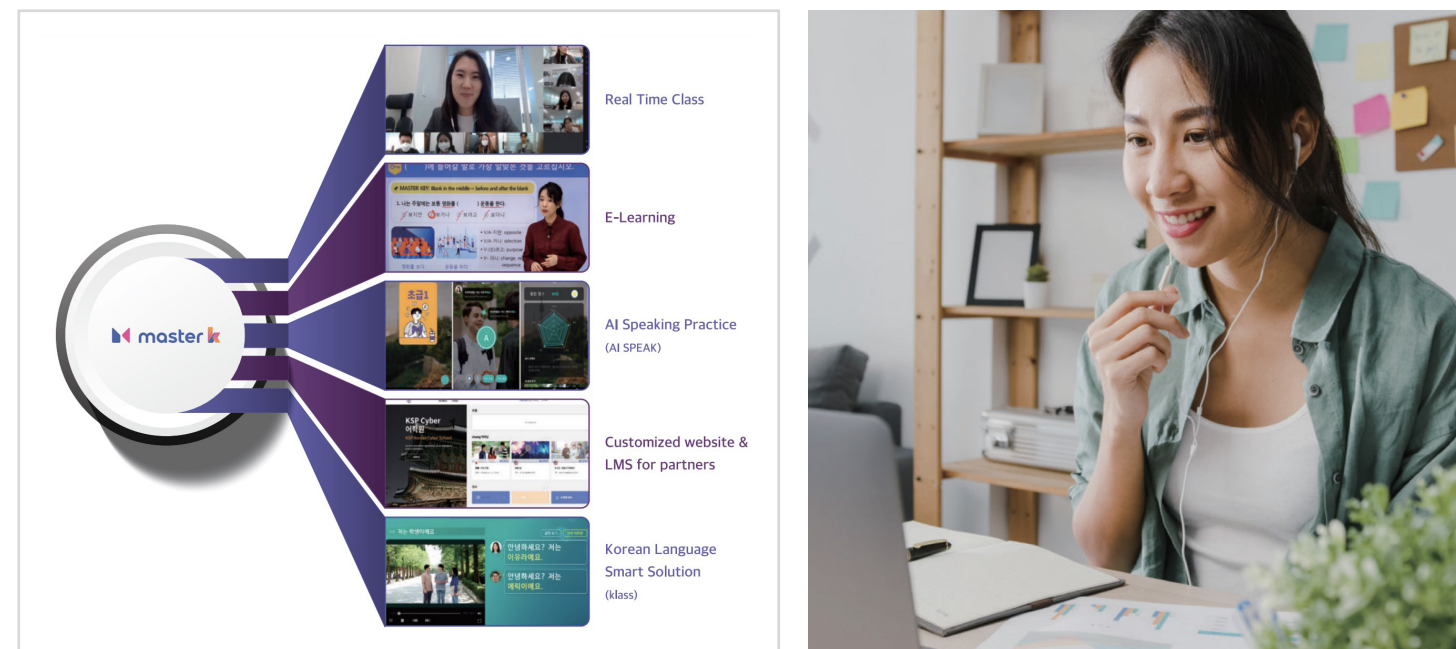

VISANG is actively participating in a major global initiative to promote the Korean language and culture. In 2019, VISANG was chosen as an Inclusive Business Solution(IBM) partner company by Korea International Cooperation Agency (KOICA) for the Vietnam Digital Korean Language Education Capacity Enhancement Project. VISANG is now a global leader, contributing to the popularity of Korean language education and the broader Korean cultural movement.

master k

Expanding to more than 14 countries (including U.S., Japan, India, Vietnam, Singapore, Germany, Türkiye, Philippines, and Indonesia)

Korean language is rapidly gaining global significance, and VISANG 'master k' program is facilitating connections between people worldwide and Korean language schools. It functions as a virtual language school, offering an all-in-one online platform that manages all tasks from admissions to lessons and assessments. This platform incorporates cutting-edge technologies and content essential for effective remote class for language education. Vietnamese middle and high schools have adopted master k as their remote Korean language education program, positioning VISANG at the forefront of promoting Korean language and culture across various age groups worldwide.

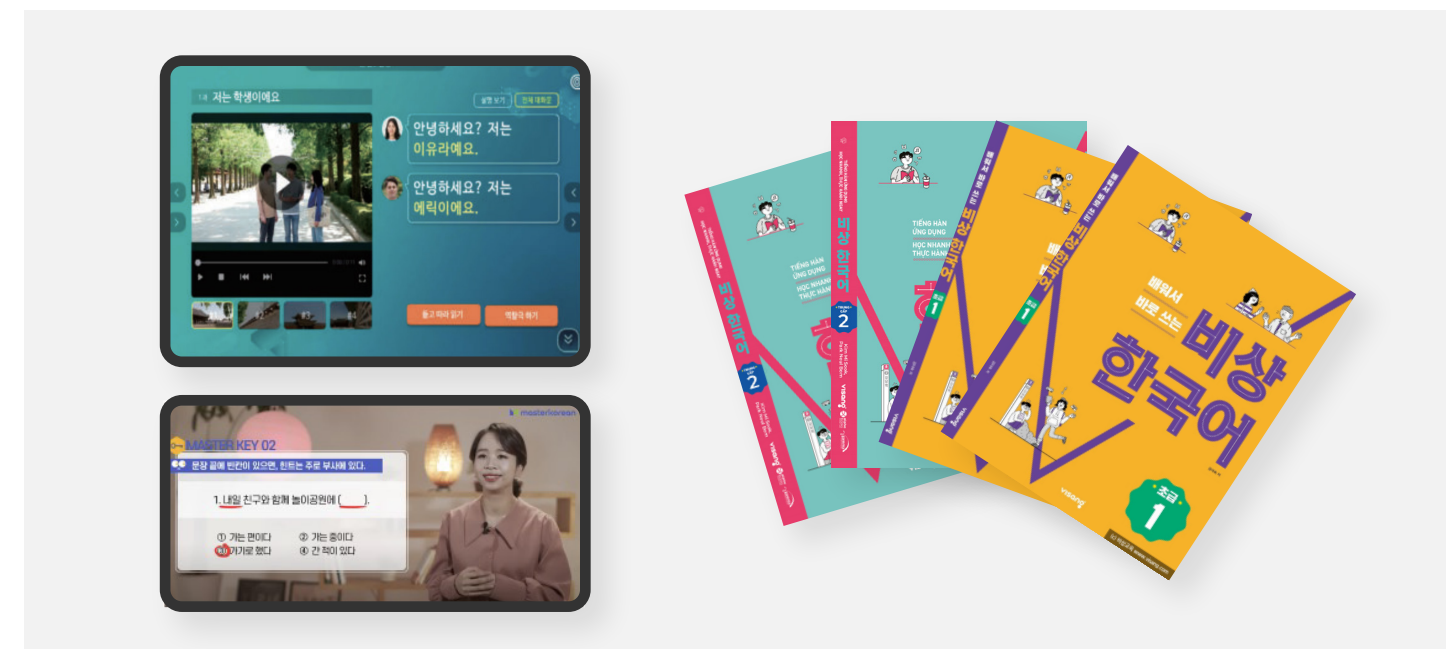

masterkorean · klass

Official partner of KOICA's Inclusive Business Program (IBM)

'masterkorean' is an online platform primarily used in Vietnam, offering Korean language learning and job support services. This platform bridges the gap between learning Korean and job opportunities by providing business Korean content for beginners and offering indirect exposure to Korean companies. Additionally, it offers an online Korean language education program called 'klass,' which is currently used at 26 universities in Vietnam, with 28 smart classrooms established. VISANG provides high-quality educational platforms and content to meet the needs of all learners seeking Korean language education.

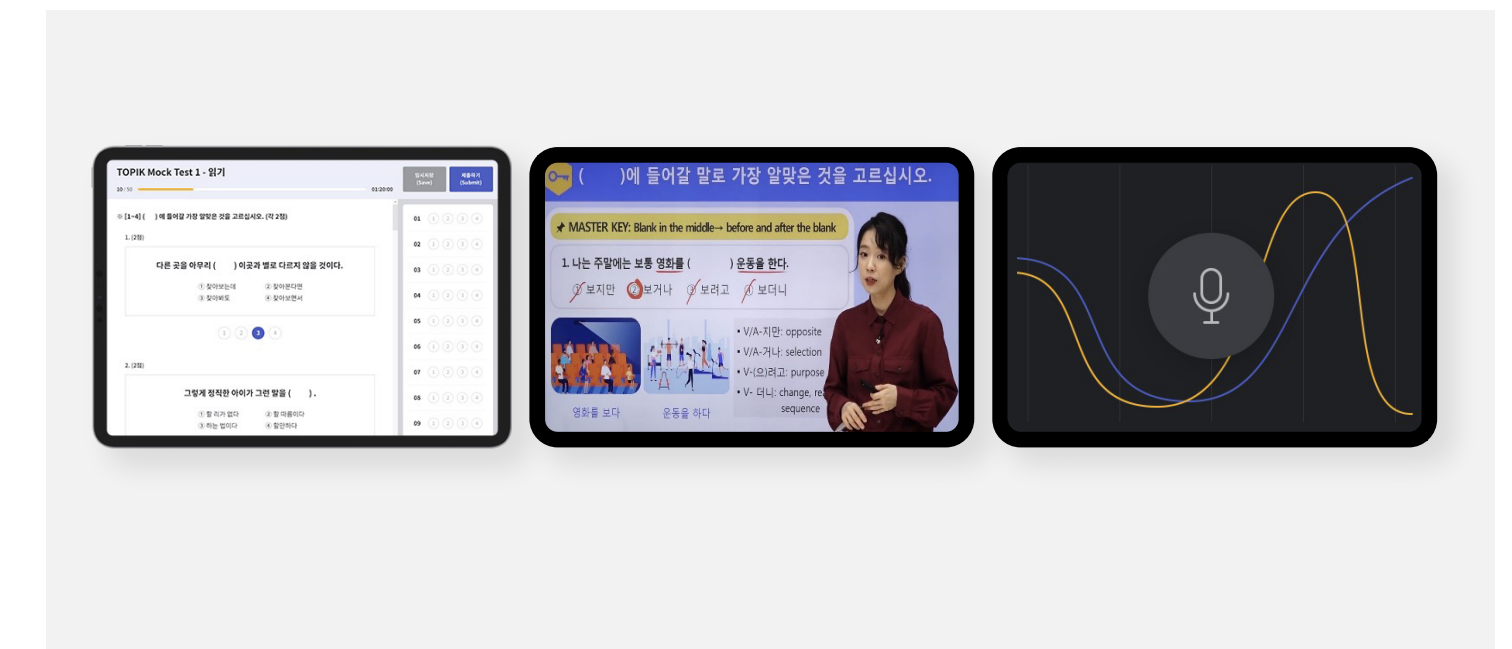

masterTOPIK

Offers global e-learning subscription services and has signed multiple B2B contracts with businesses, both local and international

'masterTOPIK' offers TOPIK-specialized content, a CBT practice test service that can be taken anywhere in the world, and a personalized learning curriculum. The AI pronunciation assessment service has also been updated for TOPIK speaking test preparation, which was added in 2022. Additionally, it provides e-learning courses for foreign national employees of major affiliates and overseas subsidiaries within the HD Hyundai Group.

Educational Publishing

VISANG aims to create comprehensive educational materials for students to learn independently. Our supplementary books have sold over 100 million copies, making them ideal for self-learning. Furthermore, VISANG is expanding its scope to include high-quality textbooks that align with the Ministry of Education's vision and our beliefs, ensuring equal learning opportunities for all. With skilled teams and up-to-date printing facilities, VISANG has been producing an official publisher of government-authorized titles for elementary school textbooks since 2016. Despite the relatively short history, VISANG has gained recognition for its expertise in developing, editing, and publishing educational materials.

VISANG Textbooks

In 2015, VISANG embarked on the national textbook project, starting as an official publisher of 2016 government-authorized titles for science and integrated subjects. Subsequently, VISANG was chosen as an official publisher of government-authorized elementary science textbooks from 2017 to 2019, mathematics textbooks from 2020 to 2022, and ethics textbooks from 2023 to 2025. This recognition affirmed VISANG's core capabilities and educational expertise.

VISANG Supplementary Books

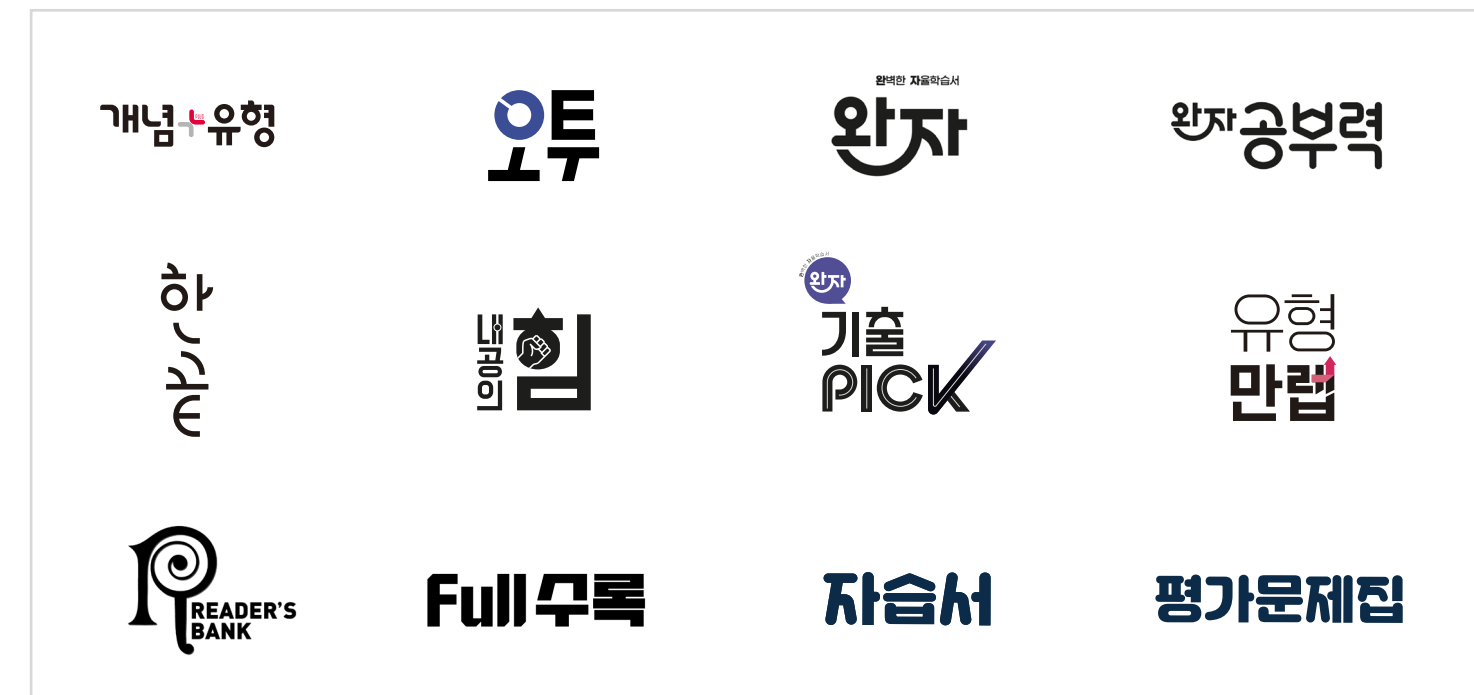

VISANG published 'HAN-KEUT,' the first middle school level supplementary book for the Korean language, in 1998, followed by best-selling books such as 'Wanja,' 'O2,' and 'Gaeyeom+Yoohyeong.' VISANG has since grown into Korea's leading educational publisher, selling more than 180 million copies and successfully launching six mega brands that have each sold more than 10 million copies.

4.2 million copies

Total copies of "Wanja" sold
3.5 million copies

Publications

To establish a seamless, one-stop system for the entire publishing process—from editing to production—VISANG founded 'Terabooks', a comprehensive printing company, in 2010. In 2013, Terabooks opened its new headquarters in Paju, equipped with state-of-the-art production systems for plating (CTP, CTF), printing (rotary, sheet-fed), and binding (perfect binding, saddle stitching). Additionally, Terabooks has obtained certifications for environmental management systems, quality management systems, G7 standards, risk assessment, and clean workplace designation, ensuring a sustainable printing environment and rigorous quality control.

2 patents acquired

Early Childhood Institution

With the goal of enabling everyone to explore the world and understand the significance of small steps at the beginning of their educational journey, VISANG provides optimized educational solutions for all age groups, drawing from years of experience. VISANG introduces a new concept of learning based on a digital environment, which allows children to realize self-directed learning and discover that education is not solely about exam preparation. Our aim is to help them gain confidence and foster interest in learning by developing effective, in-depth learning through a more systematic learning system.

Nooppool

'Nooppool' offers a diverse selection of play materials catered to toddlers' experiences, interests, and age-specific needs. The play materials are designed to impart the knowledge and experiences required of the times, fostering the comprehensive development of toddlers through play.

Sehim

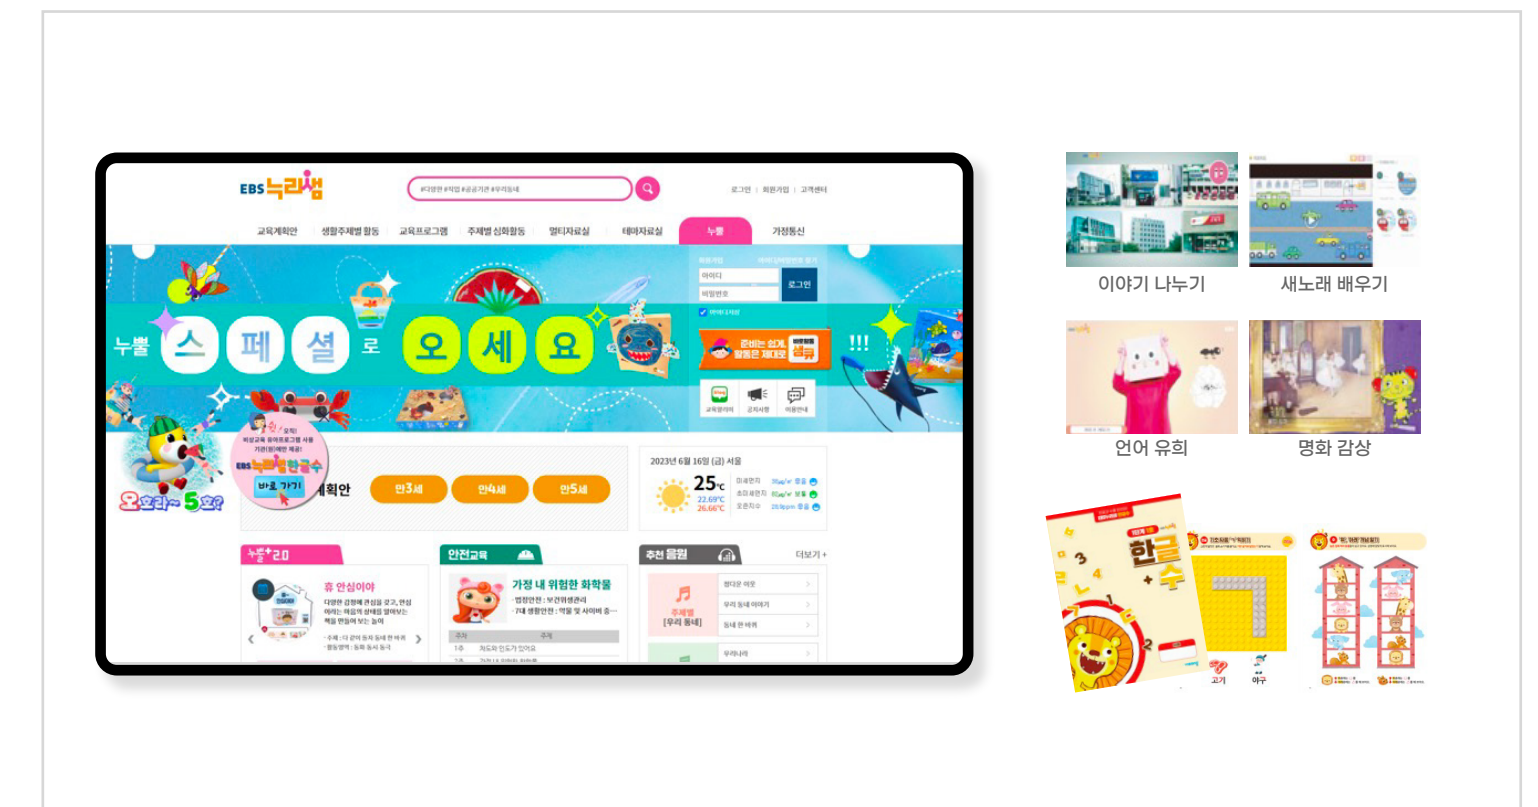

'Sehim' offers a collection of top-quality picture books, including award-winning works from around the world. This program is specifically crafted to encourage children to develop their reading skills. It is the only curriculum grounded in the six key components of early childhood literacy that can facilitate expressive literacy development through activities connected to picture books.

EBS Nurisam

'EBS Nurisam' supports the seamless operation for the kindergarten-integrated curriculum with more than 25,000 multimedia teaching materials that cover educational plans for each age level, including story discussion, animated fairy tales and songs. It is an EBS(Educational Broadcasting System) program featuring a systematic curriculum tailored to the appropriate age and developmental stage, covering Korean language and math education contents.

Early Childhood Institution

heim schule

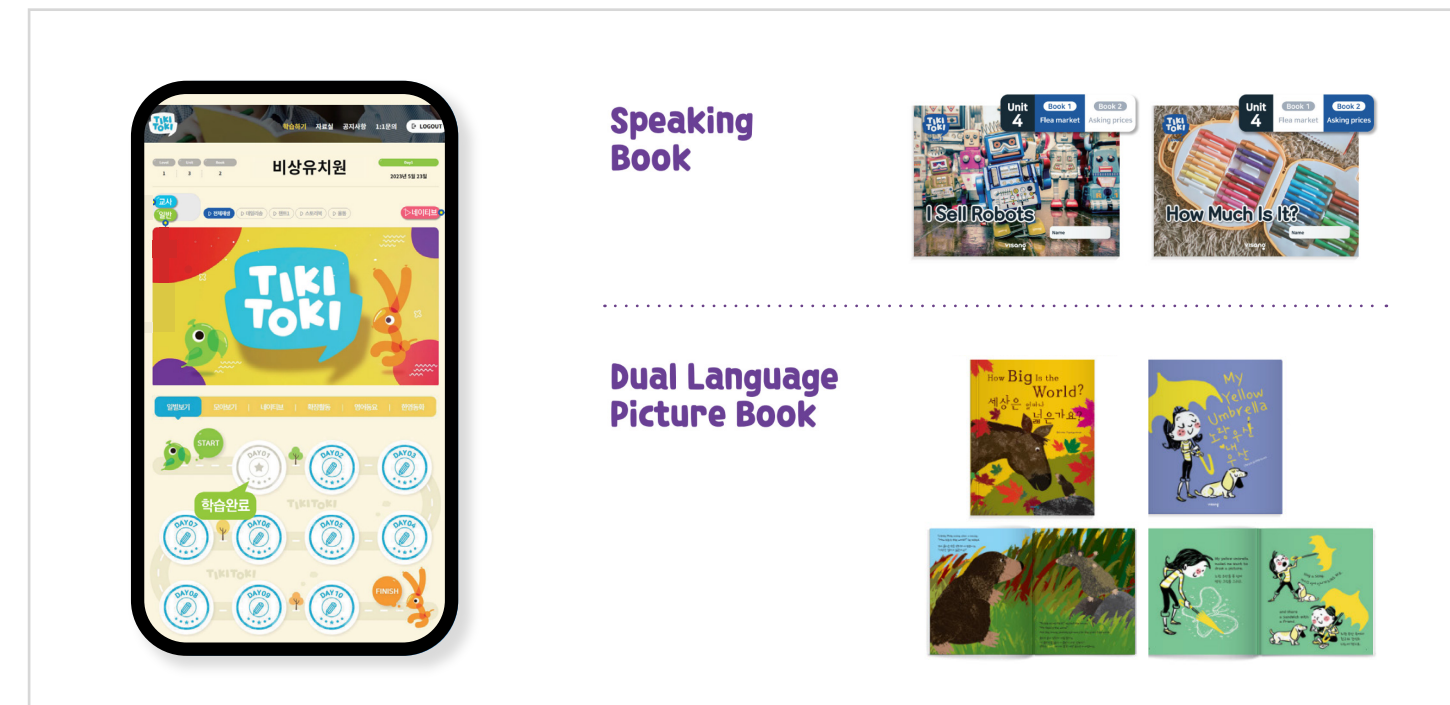

The first early childhood development program in Korea! 'heim schule' is designed with a total of 30 steps to offer toddlers the experiences and stimulation they need at the right times. By playing games with teaching aids and engaging with picture books, they can achieve balanced development and discover the joy of 'genuine fun' through experiencing 1,000 games with home-visiting teachers.

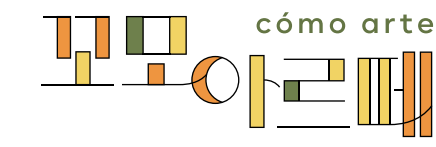

TIKITOKI

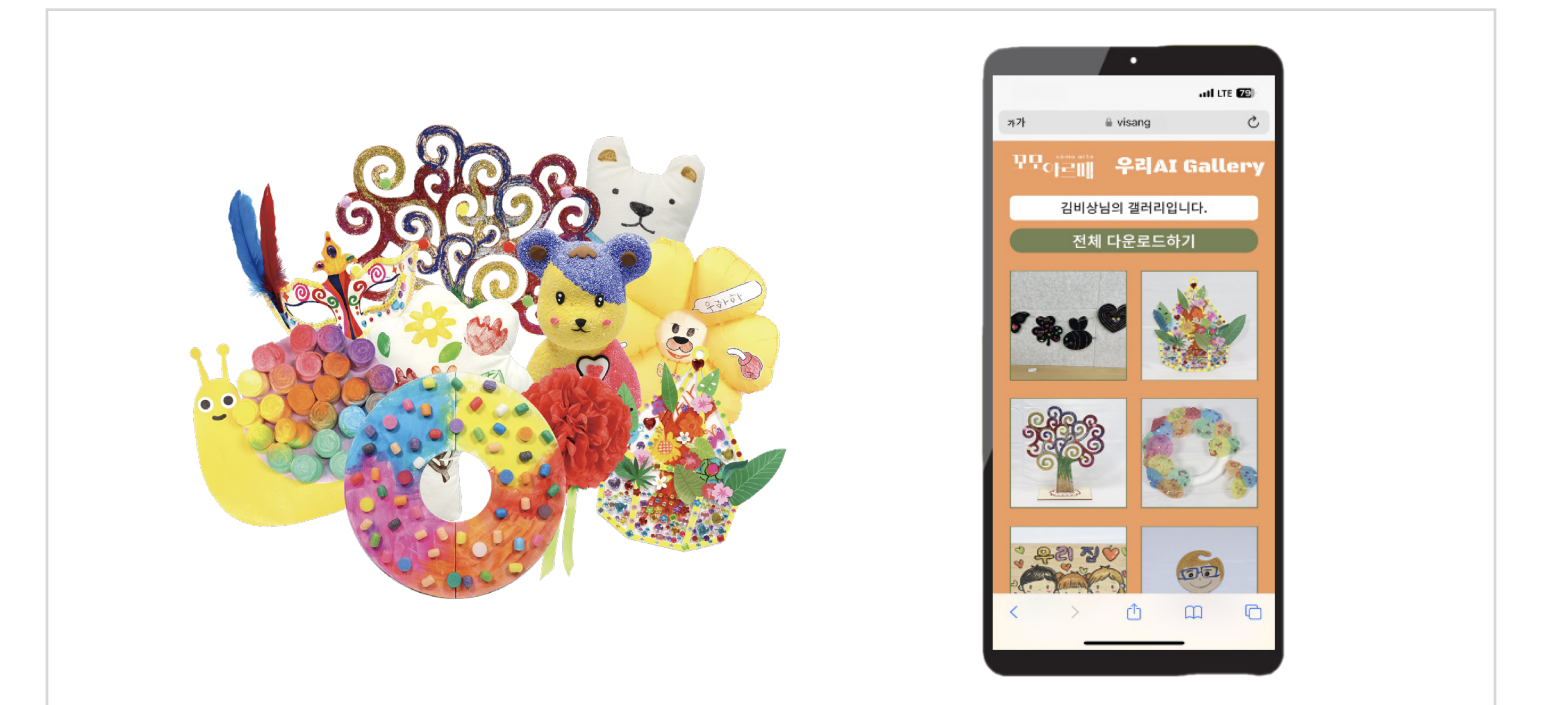

Meet English in the classroom for just 10 minutes a day! 'TIKITOKI' enables teachers to become comfortable with English and helps students build habits of using English through daily exposure to a variety of content. The program offers a range of teacher-friendly content, engages students, and produces excellent educational results. It represents a new model for early childhood classroom English programs that satisfies teachers, children, and parents.

cómo arte

A cross-over early childhood art program for creative future talents! 'cómo arte' offers a rich array of materials and diverse activities that enable young children to create art pieces. It is supported by 'AI docents' that describe children's creations like artworks exhibited in a museum, and an 'AI gallery app' that allows easy collection and viewing of children's artwork from anywhere at any time, providing an even more enriching artistic experience.

Math Academy · Evaluation

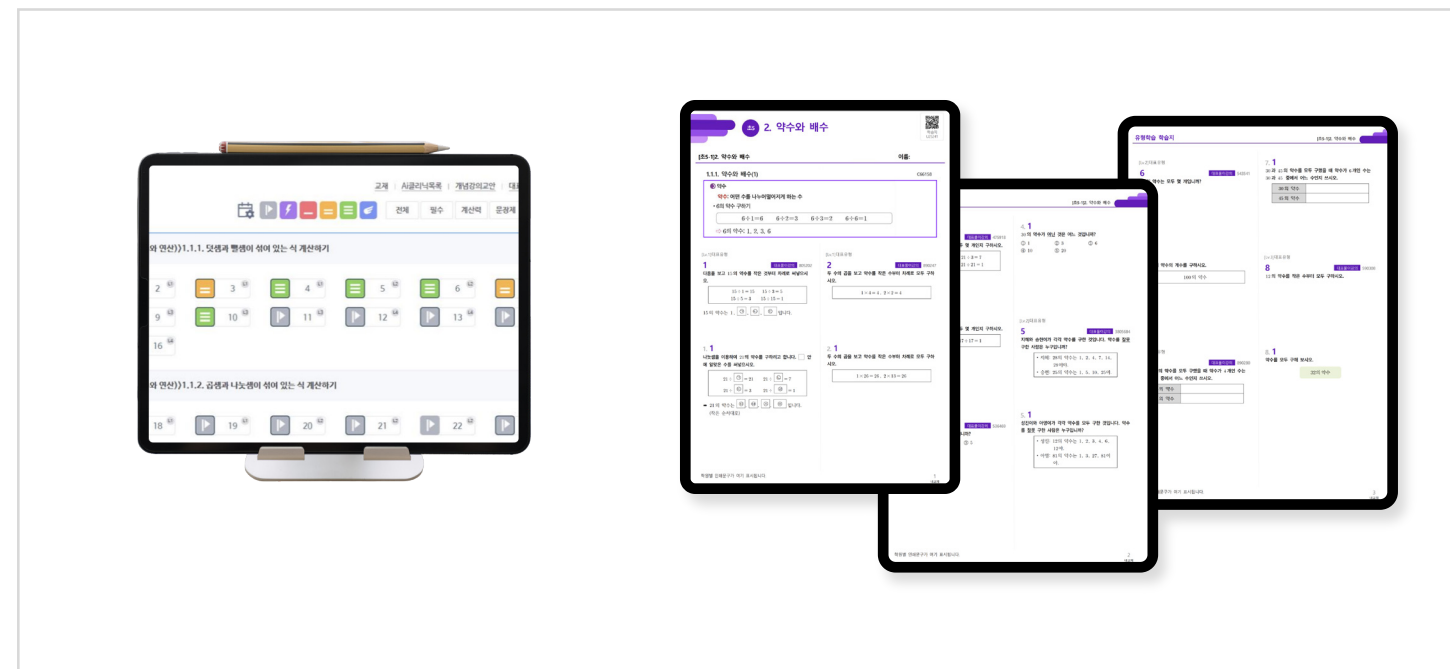

The process of learning and achieving differs for each student. VISANG offers personalized 1:1 solutions and academic assessments that drive math growth in Korea. Students become more interested in math as their skills and confidence improve, and instructors can focus on each student's development with the help of a user-friendly and innovative learning system based on our own EdTech solution.

Soohak Plus Learning

Leading the EdTech Era with an AI-Powered Math Learning Program!

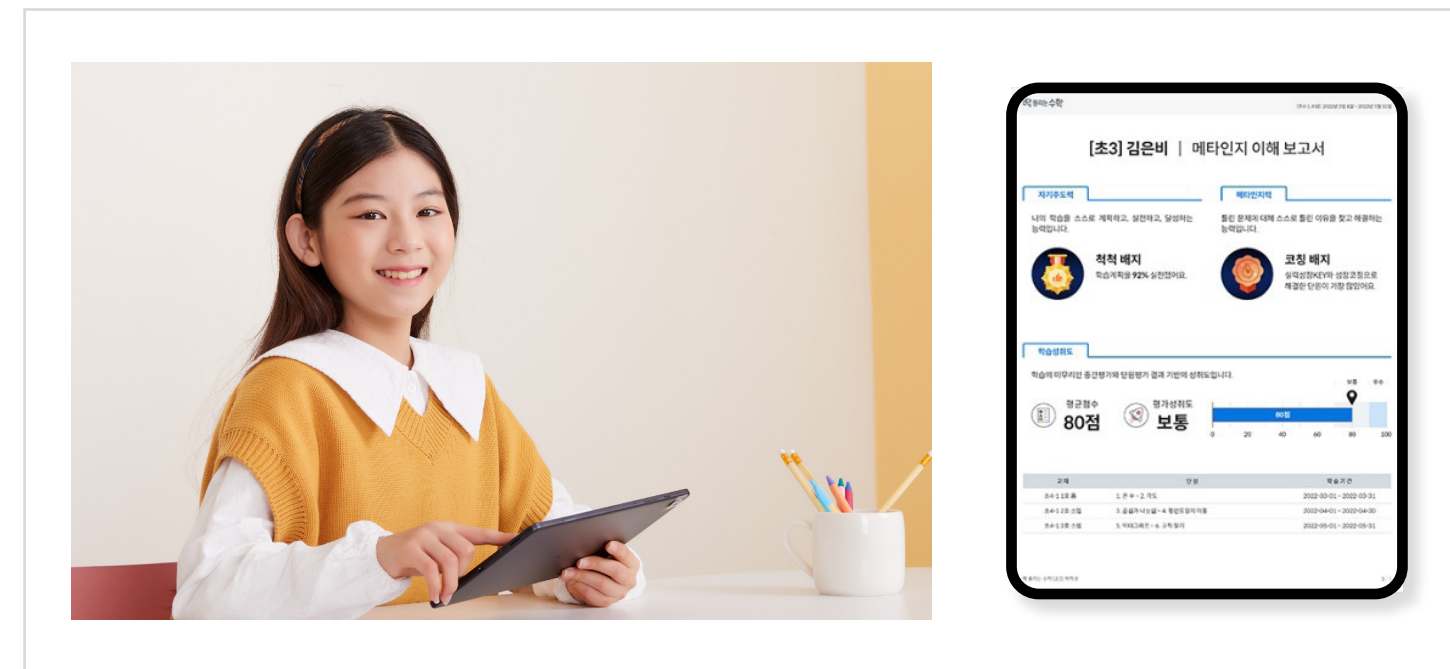

Every child is unique, just like their fingerprints, which is why each student needs an individualized learning plan. 'Soohak Plus Learning' provides personalized 1:1 math instruction. The program aligns with various textbooks, offers AI-generated practice tests, and provides concept lectures along with step-by-step solution videos. AI Error Clinics and personalized twin tests reinforce mastery. With over 8,000 institutions onboard, Soohak Plus Learning empowers students to excel in math.

ddaksoo

The journey to the answer matters more than the answer itself. 'ddaksoo' is an elementary math franchise integrating VISANG's metacognitive learning expertise. During this critical stage, students build core math skills through five-sense learning, reinforcing concepts five times with smart learning materials and level-specific print textbooks. Aligned with the 2022 revised curriculum, the program enhances learning by requiring students to articulate their thinking processes and retrieve learned concepts. They also analyze mistakes independently, receive personalized feedback, and reattempt problems to strengthen metacognitive skills.

TESOM

'TESOM,' A national math assessment program for elementary and middle school students. It offers students, educators, and parents who support mathematics education an opportunity to explore the potential of mathematics. Through precise analysis, TESOM evaluates students' comprehension of fundamental concepts and provides insights into the future of math learning.

English Academy · Evaluation

Language is both a product and a reflection of culture. English becomes a vibrant language when it's integrated with culture, not when it is treated as just another subject in class. VISANG centers on the core of English and is shaping an English education program and culture. We are also introducing a two-way English teaching system that uses advanced technology to analyze data in real time and offer personalized solutions. Our English program has been exported to the United Kingdom, the birthplace of English. VISANG is a leader in K-Education.

englisheye

'englisheye' is a self-directed English learning program designed for elementary and middle school students. It was launched in January 2015, marking the beginning of VISANG's EdTech platform. englisheye was unveiled after three years of development, emphasizing 'Real English.' VISANG has signed its franchise contracts with 1,300 academies domestically and has also introduced the program to students internationally, including in Vietnam, Paraguay, and Colombia.

 Japan e-Learning Award Global Special Award	 UK BETT Awards reached the finals	 Colombia The Order of Merit for Civil Service
---	--	--

ELiF English Academy

'ELiF English Academy' introduces an interactive learning environment in which teachers and students actively engage in classes. The ELiF program demonstrates real-time learning content by providing and receiving feedback using the teacher's interactive whiteboard and students' tablet PCs. ELiF, already renowned globally, made its debut as an English academy in Korea in September 2022 and is now in operation in over 100 establishments, streamlining the convenience and efficiency of academic solutions through systematic content provision.

VPEAT

'VPEAT' is an English proficiency assessment developed with VISANG's content expertise and LXPER's AI-driven personalized learning technology. Reviewed by English education experts, it is certified by the Korean Association of Teachers of English (KATE). Through nationwide assessments, VPEAT provides a benchmark of current proficiency and AI-driven score predictions. It helps motivate students, supports learning plans, and enhances English skills.
